-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204h
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy
Safety Set

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Gamma-glutamyltransferase increased	1 (100)	0	0	1 (100)	0

Timing: Any time post CTL019 infusion, BCR-ABL1-like: Yes

	All patients N=1				
Primary system organ class Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Skin and subcutaneous tissue disorders					
-Total	1 (100)	0	1 (100)	0	0
Photosensitivity reaction	1 (100)	0	1 (100)	0	0

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204i
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like
Safety Set

Timing: Any time post CTL019 infusion, BCR-ABL1-like: No

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204j
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes
Safety Set

Timing: within 8 weeks post infusion, Complex karyotypes II (>=5 unrelated abnormalities) : Yes

			All patients N=27

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204j
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204j
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204j
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204k
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Region
Safety Set

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204k
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Region

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Hypertension	1 (5.9)	0	0	1 (5.9)	0

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204l
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy
Safety Set

Timing: Any time post CTL019 infusion, Prior SCT therapy: Yes

	All patients N=48

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204m
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT
Safety Set

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204m
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT
Safety Set

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204n
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden
Safety Set

Timing: within 8 weeks post infusion, Baseline bone marrow tumor burden: Low

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204n
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204n
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204n
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden
Safety Set

Timing: >8 weeks to 1 year post CTL019 infusion, Baseline bone marrow tumor burden: High

Capillary leak syndrome	1 (3.8)	0	0	1 (3.8)	0

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204n
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden
Safety Set

Timing: Any time post CTL019 infusion, Baseline bone marrow tumor burden: High

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204o
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence
Safety Set

Timing: within 8 weeks post infusion, Baseline extramedullary disease presence: Yes

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204o
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence
Safety Set

Timing: >8 weeks to 1 year post CTL019 infusion, Baseline extramedullary disease presence: Yes

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204p
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Down syndrome
Safety Set

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204p
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Down syndrome

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency

of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204p
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Down syndrome

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204q
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion
Safety Set

Timing: within 8 weeks post infusion, Time since enrollment to CTL019 infusion: > Median

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204q
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204q
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency

of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204q
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204r
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204r
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204r
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204r
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204r
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency

of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and

CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency

of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and

CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis

product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and

CTCAE version 4.03 have been used for the reporting of adverse events.

White blood cell count decreased	1 (50.0)	0	0	0	1 (50.0)

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 205i
Adverse events before study treatment, by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 205k
Adverse events before study treatment, by primary system organ class, preferred term, maximum CTC grade and Region

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 205m

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and

CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility -Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. - MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility -Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. - MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 206j
Adverse events during the lymphodepleting period, regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes
Enrolled set - Patients who received lymphodepleting chemotherapy

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility -Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion are summarized. -A patient with multiple adverse events within a primary system organ class is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column. - MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.
