Dossier zur Nutzenbewertung gemäß § 35a SGB V

Tisagenlecleucel (Kymriah®)

Novartis Pharma GmbH

Modul 4 A - Separater Anhang 4-H.1 (Teil 1)

Refraktäre oder rezidivierte pädiatrische akute lymphatische B-Zell-Leukämie

Studie CCTL019B2202 (ELIANA)

Stand: 31.08.2023

Table of Contents

Table 31a => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Age (Full analysis set) 27
Table 31b => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Gender (Full analysis set) 30
Table 31c => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Race (Full analysis set) 33
Table 31d => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Ethnicity (Full analysis set) 37
Table 31e => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Response status at study entry (Full analysis set) 40
Table 31f => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Philadelphia chromosome/BCR-ABL (Full analysis set) 43
Table 31g => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by MLL rearrangement (Full analysis set) 46
Table 31h => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Hypodiploidy (Full analysis set) 49
Table 31i => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by BCR-ABL1-like (Full analysis set) 52
Table 31j => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Complex Karyotypes (Full analysis set) 55
Table 31k => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Region (Full analysis set) 58
Table 31l => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Prior SCT therapy (Full analysis set) 62
Table 31m => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Eligibility for SCT (Full analysis set) 65
Table 31n => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Baseline bone marrow tumor burden (Full analysis set) 68
Table 31o => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Baseline extramedullary disease presence (Full analysis set) 71
Table 31p => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Down syndrome (Full analysis set) 74
Table 31q => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Time since enrollment to CTL019 infusion (Full analysis set) 77
Table 31r => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Number of previous relapses (Full analysis set) 80

Table 32a => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Age (Enrolled set) 85
Table 32b => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Gender (Enrolled set) 89
Table 32c => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Race (Enrolled set) 92
Table 32d => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Ethnicity (Enrolled set) 96
Table 32e => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Response status at study entry (Enrolled set) 99
Table 32f => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Philadelphia chromosome/BCR-ABL (Enrolled set) 102
Table 32g => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by MLL rearrangement (Enrolled set) 105
Table 32h => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Hypodiploidy (Enrolled set) 108
Table 32i => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by BCR-ABL1-like (Enrolled set) 111
Table 32j => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Complex Karyotypes (Enrolled set) 114
Table 32k => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Region (Enrolled set) 117
Table 32l => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Prior SCT therapy (Enrolled set) 121
Table 32m => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Eligibility for SCT (Enrolled set) 124
Table 32n => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Baseline bone marrow tumor burden (Enrolled set) 127
Table 32o => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Baseline extramedullary disease presence (Enrolled set) 130
Table 32p => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Down syndrome (Enrolled set) 133
Table 32q => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Time since enrollment to CTL019 infusion (Enrolled set) 136
Table 32r => Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Number of previous relapses (Enrolled set) 139
Table 194a => Overall survival (OS) by Age (Full analysis set) 144
Table 194b => Overall survival (OS) by Gender (Full analysis set) 151
Table 194c => Overall survival (OS) by Race (Full analysis set) 156

Table 194d => Overall survival (OS) by Ethnicity (Full analysis set) 163
Table 194e => Overall survival (OS) by Response status at study entry (Full analysis set) 168
Table 194f => Overall survival (OS) by Philadelphia chromosome/BCR-ABL (Full analysis set) 173
Table 194g => Overall survival (OS) by MLL rearrangement (Full analysis set) 178
Table 194h => Overall survival (OS) by Hypodiploidy (Full analysis set) 183
Table 194i => Overall survival (OS) by BCR-ABL1-like (Full analysis set) 188
Table 194j => Overall survival (OS) by Complex Karyotypes (Full analysis set) 193
Table 194k => Overall survival (OS) by Region (Full analysis set) 198
Table 194l => Overall survival (OS) by Prior SCT therapy (Full analysis set) 205
Table 194m => Overall survival (OS) by Eligibility for SCT (Full analysis set) 210
Table 194n => Overall survival (OS) by Baseline bone marrow tumor burden (Full analysis set) 215
Table 194o => Overall survival (OS) by Baseline extramedullary disease presence (Full analysis set) 220
Table 194p => Overall survival (OS) by Down syndrome (Full analysis set) 225
Table 194q => Overall survival (OS) by Time since enrollment to CTL019 infusion (Full analysis set) 230
Table 194r => Overall survival (OS) by Number of previous relapses (Full analysis set) 235
Table 195a => Overall survival (OS) by Age (Enrolled set) 244
Table 195b => Overall survival (OS) by Gender (Enrolled set) 251
Table 195c => Overall survival (OS) by Race (Enrolled set) 256
Table 195d => Overall survival (OS) by Ethnicity (Enrolled set) 263
Table 195e => Overall survival (OS) by Response status at study entry (Enrolled set) 268
Table 195f => Overall survival (OS) by Philadelphia chromosome/BCR-ABL (Enrolled set) 273
Table 195g => Overall survival (OS) by MLL rearrangement (Enrolled set) 278
Table 195h => Overall survival (OS) by Hypodiploidy (Enrolled set) 283
Table 195i => Overall survival (OS) by BCR-ABL1-like (Enrolled set) 288
Table 195j => Overall survival (OS) by Complex Karyotypes (Enrolled set) 293
Table 195k => Overall survival (OS) by Region (Enrolled set) 298
Table 195l => Overall survival (OS) by Prior SCT therapy (Enrolled set) 305
Table 195m => Overall survival (OS) by Eligibility for SCT (Enrolled set) 310
Table 195n => Overall survival (OS) by Baseline bone marrow tumor burden (Enrolled set) 315
Table 195o => Overall survival (OS) by Baseline extramedullary disease presence (Enrolled set) 320
Table 195p => Overall survival (OS) by Down syndrome (Enrolled set) 325
Table 195q => Overall survival (OS) by Time since enrollment to CTL019 infusion (Enrolled set) 330
Table 195r => Overall survival (OS) by Number of previous relapses (Enrolled set) 337
Table 196a => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Age (Full analysis set) 346
Table 196b => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Gender (Full analysis set) 350
Table 196c => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Race (Full analysis set) 353

Table 196d => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Ethnicity (Full analysis set) 357
Table 196e => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Response status at study entry (Full analysis set) 360
Table 196f => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Philadelphia chromosome/BCR-ABL (Full analysis set) 363
Table 196g => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by MLL rearrangement (Full analysis set) 367
Table 196h => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Hypodiploidy (Full analysis set) 370
Table 196i => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by BCR-ABL1-like (Full analysis set) 373
Table 196j => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Complex Karyotypes (Full analysis set) 376
Table 196k => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Region (Full analysis set) 379
Table 196l => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Prior SCT therapy (Full analysis set) 383
Table 196m => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Eligibility for SCT (Full analysis set) 386
Table 196n => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Baseline bone marrow tumor burden (Full analysis set) 389
Table 196o => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Baseline extramedullary disease presence (Full analysis set) 392
Table 196p => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Down syndrome (Full analysis set) 395
Table 196q => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Time since enrollment to CTL019 infusion (Full analysis set) 398
Table 196r => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Number of previous relapses (Full analysis set) 401
Table 197a => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Age (Enrolled set) 407
Table 197b => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Gender (Enrolled set) 411
Table 197c => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Race (Enrolled set) 414
Table 197d => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Ethnicity (Enrolled set) 418

Table 197e => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Response status at study entry (Enrolled set) 421
Table 197f => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Philadelphia chromosome/BCR-ABL (Enrolled set) 424
Table 197g => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by MLL rearrangement (Enrolled set) 428
Table 197h => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Hypodiploidy (Enrolled set) 431
Table 197i => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by BCR-ABL1-like (Enrolled set) 434
Table 197j => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Complex Karyotypes (Enrolled set) 437
Table 197k => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Region (Enrolled set) 440
Table 197l => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Prior SCT therapy (Enrolled set) 444
Table 197m => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Eligibility for SCT (Enrolled set) 447
Table 197n => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Baseline bone marrow tumor burden (Enrolled set) 450
Table 197o => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Baseline extramedullary disease presence (Enrolled set) 453
Table 197p => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Down syndrome (Enrolled set) 456
Table 197q => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Time since enrollment to CTL019 infusion (Enrolled set) 459
Table 197r => Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Number of previous relapses (Enrolled set) 463
Table 198a => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Age (Full analysis set - Patients >= 8 years at enrollment) 469
Table 198b => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Gender (Full analysis set - Patients >= 8 years at enrollment) 476
Table 198c => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Race (Full analysis set - Patients >= 8 years at enrollment) 481
Table 198d => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Ethnicity (Full analysis set - Patients >= 8 years at enrollment) 488
Table 198e => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Response status at study entry (Full analysis set - Patients >= 8 years at enrollment) 493

Table 198f => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Philadelphia chromosome/BCR-ABL (Full analysis set - Patients >= 8 years at enrollment) 499
Table 198g => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by MLL rearrangement (Full analysis set - Patients >= 8 years at enrollment) 505
Table 198h => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Hypodiploidy (Full analysis set - Patients >= 8 years at enrollment) 510
Table 198i => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by BCR-ABL1-like (Full analysis set - Patients >= 8 years at enrollment) 515
Table 198j => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Complex Karyotypes (Full analysis set - Patients >= 8 years at enrollment) 520
Table 198k => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Region (Full analysis set - Patients >= 8 years at enrollment) 526
Table 198l => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Prior SCT therapy (Full analysis set - Patients >= 8 years at enrollment) 533
Table 198m => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Eligibility for SCT (Full analysis set - Patients >= 8 years at enrollment) 539
Table 198n => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Baseline bone marrow tumor burden (Full analysis set - Patients >= 8 years at enrollment) 545
Table 198o => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Baseline extramedullary disease presence (Full analysis set - Patients >= 8 years at enrollment) 551
Table 198p => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Down syndrome (Full analysis set - Patients >= 8 years at enrollment) 557
Table 198q => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Time since enrollment to CTL019 infusion (Full analysis set - Patients >= 8 years at enrollment) 563
Table 198r => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Number of previous relapses (Full analysis set - Patients >= 8 years at enrollment) 569
Table 199a => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Age (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 579
Table 199b => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Gender (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 586
Table 199c => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Race (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 591
Table 199d => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Ethnicity (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 598
Table 199e => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Response status at study entry (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 603
Table 199f => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Philadelphia chromosome/BCR-ABL (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 608

Table 199g => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by MLL rearrangement (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 613
Table 199h => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Hypodiploidy (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 615
Table 199i => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by BCR-ABL1-like (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 617
Table 199j => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Complex Karyotypes (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 619
Table 199k => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Region (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 624
Table 199l => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Prior SCT therapy (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 631
Table 199m => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Eligibility for SCT (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 636
Table 199n => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Baseline bone marrow tumor burden (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 641
Table 199o => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Baseline extramedullary disease presence (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 646
Table 199p => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Down syndrome (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 651
Table 199q => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Time since enrollment to CTL019 infusion (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 656
Table 199r => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in EQVAS total score by Number of previous relapses (Full analysis set - Patients >= 8 years at enrollment with BOR of CR or CRi within 3 months) 661
Table 200a => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Age (Full analysis set - Patients >= 8 years at enrollment) 670
Table 200b => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Gender (Full analysis set - Patients >= 8 years at enrollment) 677
Table 200c => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Race (Full analysis set - Patients >= 8 years at enrollment) 682
Table 200d => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Ethnicity (Full analysis set - Patients >= 8 years at enrollment) 689
Table 200e => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Response status at study entry (Full analysis set - Patients >= 8 years at enrollment) 694
Table 200f => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Philadelphia chromosome/BCR-ABL (Full analysis set - Patients >= 8 years at enrollment) 699
Table 200g => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by MLL rearrangement (Full analysis set - Patients >= 8 years at enrollment) 704

Table 200h => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Hypodiploidy (Full analysis set - Patients >= 8 years at enrollment) 706
Table 200i => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by BCR-ABL1-like (Full analysis set - Patients >= 8 years at enrollment) 708
Table 200j => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Complex Karyotypes (Full analysis set - Patients >= 8 years at enrollment) 710
Table 200k => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Region (Full analysis set - Patients >= 8 years at enrollment) 715
Table 200l => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Prior SCT therapy (Full analysis set - Patients >= 8 years at enrollment) 722
Table 200m => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Eligibility for SCT (Full analysis set - Patients >= 8 years at enrollment) 727
Table 200n => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Baseline bone marrow tumor burden (Full analysis set - Patients >= 8 years at enrollment) 732
Table 200o => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Baseline extramedullary disease presence (Full analysis set - Patients >= 8 years at enrollment) 737
Table 200p => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Down syndrome (Full analysis set - Patients >= 8 years at enrollment) 742
Table 200q => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Time since enrollment to CTL019 infusion (Full analysis set - Patients >= 8 years at enrollment) 747
Table 200r => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL total score by Number of previous relapses (Full analysis set - Patients >= 8 years at enrollment) 752
Table 201a => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by Age (Full analysis set - Patients >= 8 years at enrollment) 761
Table 201b => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by Gender (Full analysis set - Patients >= 8 years at enrollment) 792
Table 201c => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by Race (Full analysis set - Patients >= 8 years at enrollment) 813
Table 201d => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by Ethnicity (Full analysis set - Patients >= 8 years at enrollment) 844
Table 201e => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by Response status at study entry (Full analysis set - Patients >= 8 years at enrollment) 865
Table 201f => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by Philadelphia chromosome/BCR-ABL (Full analysis set - Patients >= 8 years at enrollment) 886
Table 201g => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by MLL rearrangement (Full analysis set - Patients >= 8 years at enrollment) 907
Table 201h => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by Hypodiploidy (Full analysis set - Patients >= 8 years at enrollment) 918

Table 201i => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by BCR-ABL1-like (Full analysis set - Patients >= 8 years at enrollment) 929
Table 201j => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by Complex Karyotypes (Full analysis set - Patients >= 8 years at enrollment) 940
Table 201k => Summary of Mixed-Model Repeated Measure Analysis for Change from Baseline in pedSQL subscales score by Region (Full analysis set - Patients >= 8 years at enrollment) 961

Month 33	61.9 (44.9, 75.1)
Month 36	59.3 (42.3, 72.8)
Month 39	59.3 (42.3, 72.8)
Month 42	59.3 (42.3, 72.8)
Month 45	59.3 (42.3, 72.8)
Month 48	53.6 (36.7, 67.8)

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility [1] Percentiles with 95% CIs are calculated from PROC LIFETEST output using method of Brookmeyer and Crowley (1982). [2] % Event-free probability estimate is the estimated probability that a patient will remain event-free up to the specified time point. % Event-free probability estimates are obtained from the Kaplan-Meier survival estimates; Greenwood formula is used for CIs of KM estimates.

Table 196a
Best overall response (BOR) and overall remission rate (ORR) within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Age
Full analysis set

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.
P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.

Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

Subgroup: Down syndrome: No

Analysis visit	n	LS Mean Change from Baseline	SE	95% CI	P Value
Day 28	42	7.83	2.140	(3.61, 12.04)	<.001
Month 3	40	16.18	2.193	(11.86, 20.50)	<.001
Month 6	36	16.85	2.312	(12.30, 21.40)	<.001
Month 9	29	19.10	2.576	(14.02, 24.17)	<.001
Month 12	23	19.44	2.892	(13.74, 25.14)	<.001
Month 18	19	20.03	3.182	(13.76, 26.30)	<.001
Month 24	19	21.41	3.182	(15.14, 27.68)	<.001
Month 36	17	16.48	3.364	(9.85, 23.11)	<.001
Month 48	13	23.99	3.849	(16.41, 31.57)	<.001
Month 60	15	24.27	3.582	(17.21, 31.32)	<.001

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.
P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.

Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

Month 48	11	15.85	4.082	(7.81, 23.90)	<.001
Month 60	13	18.17	3.757	(10.77, 25.58)	<.001

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

Full analysis set - Patients >= 8 years at enrollment
Parameter: PSYCHOSOCIAL HEALTH SUMMARY SCORE | Eligibility for SCT: No

Analysis visit	n	LS Mean Change from Baseline	SE	95% CI	P Value
Day 28	39	2.44	2.015	(-1.53, 6.42)	0.226
Month 3	37	10.28	2.067	(6.20, 14.35)	<.001
Month 6	35	10.07	2.127	(5.88, 14.26)	<.001
Month 9	28	12.97	2.376	(8.29, 17.65)	<.001
Month 12	21	18.75	2.744	(13.34, 24.15)	<.001
Month 18	16	17.80	3.143	(11.61, 24.00)	<.001
Month 24	18	18.27	2.963	(12.43, 24.11)	<.001
Month 36	15	13.97	3.251	(7.56, 20.37)	<.001
Month 48	11	19.04	3.791	(11.57, 26.51)	<.001
Month 60	12	17.05	3.634	(9.89, 24.21)	<.001

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square;
n = number of subjects with measurements at both baseline and the post-baseline visits.
P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.

Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

Month 60	4	6.91	8.752	(-10.65, 24.47)	0.433

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.
P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.

Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

Month 60	1	NE	NE	(NE, NE)	NE

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

Month 48	4	23.69	8.950	(5.79, 41.59)	0.010
Month 60	3	11.03	10.301	(-9.58, 31.64)	0.289

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

Month 60	7	15.15	5.053	(5.11, 25.18)	0.003

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.
P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.

Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

-Full analysis set (FAS) = All patients who received an infusion of CTL019 CI = confidence interval; LS = least square; n = number of subjects with measurements at both baseline and the post-baseline visits.

P-values are for nominal use only and should be interpreted as descriptive rather than inferential statistics.
Note: Only subjects with baseline and post-baseline assessments are included.
LS Mean, 95% CI, and P value are from a mixed-effects model for repeated measures where the change from baseline in PRO score is modeled as a function of analysis visit as a categorical covariate and baseline score as a continuous covariate with an Variance Component covariance structure.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204a
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Age
Safety Set

Timing: >8 weeks to 1 year post CTL019 infusion, Age: <10 years

Primary system organ class Preferred term	All grades n (%)	Grade 1 n (%)	Grade 2 n (%)	Grade 3 n (%)	Grade 4 n (%)
			All patients N=30		
Night sweats	1 (3.3)	1 (3.3)	0	0	0
Photosensitivity reaction	1 (3.3)	0	1 (3.3)	0	0
Rash	1 (3.3)	1 (3.3)	0	0	0

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204a
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Age

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204b
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Gender

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204b
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Gender

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204b
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Gender
Safety Set

Timing: Any time post CTL019 infusion, Gender: Female

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204c
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Race

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204c
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Race

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency

of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency

of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204d
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Ethnicity

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204d
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Ethnicity

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204e
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Response status at study entry
Safety Set

Timing: within 8 weeks post infusion, Response status at study entry: Primary refractory

Hypertension	1 (16.7)	0	0	1 (16.7)	0

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204e
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Response status at study entry
Safety Set

Timing: within 8 weeks post infusion, Response status at study entry: Relapsed disease

			All patients N=74

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204e
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Response status at study entry

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204e
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Response status at study entry

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204g
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement
Safety Set

Timing: within 8 weeks post infusion, Mixed-lineage leukemia rearrangement: Yes

Rash pruritic	1 (100)	1 (100)	0	0	0

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204g
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement
Safety Set

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204h
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy
Safety Set

Timing: within 8 weeks post infusion, Hypodiploidy: Yes

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204h
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy
Safety Set

Timing: >1 year post-CTL019 infusion, Hypodiploidy: No

	All patients N=49				
Primary system organ class Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	31 (63.3)	3 (6.1)	9 (18.4)	12 (24.5)	7 (14.3)
Blood and lymphatic system disorders					
-Total	3 (6.1)	0	1 (2.0)	1 (2.0)	1 (2.0)
Agranulocytosis	1 (2.0)	0	0	1 (2.0)	0
Anaemia	1 (2.0)	0	1 (2.0)	0	0
Hypercoagulation	1 (2.0)	0	1 (2.0)	0	0
Neutropenia	1 (2.0)	0	0	0	1 (2.0)
Thrombocytopenia	1 (2.0)	0	1 (2.0)	0	0
Congenital, familial and genetic disorders					
-Total	1 (2.0)	1 (2.0)	0	0	0

Timing: >1 year post-CTL019 infusion, Hypodiploidy: No

	All patients N=49				
Primary system organ class Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Cerebral cavernous malformation	1 (2.0)	1 (2.0)	0	0	0
Ear and labyrinth disorders					
-Total	1 (2.0)	0	1 (2.0)	0	0
Deafness unilateral	1 (2.0)	0	1 (2.0)	0	0
Endocrine disorders					
-Total	1 (2.0)	0	1 (2.0)	0	0
Delayed puberty	1 (2.0)	0	1 (2.0)	0	0
Hypothyroidism	1 (2.0)	0	1 (2.0)	0	0
Eye disorders					
-Total	3 (6.1)	1 (2.0)	1 (2.0)	1 (2.0)	0
Dry eye	1 (2.0)	1 (2.0)	0	0	0
Eye pain	1 (2.0)	0	0	1 (2.0)	0
Eyelid oedema	1 (2.0)	1 (2.0)	0	0	0
Mydriasis	1 (2.0)	0	1 (2.0)	0	0
Gastrointestinal disorders					
-Total	7 (14.3)	4 (8.2)	2 (4.1)	1 (2.0)	0
Diarrhoea	5 (10.2)	3 (6.1)	1 (2.0)	1 (2.0)	0

Timing: >1 year post-CTL019 infusion, Hypodiploidy: No

	All patients N=49				
Primary system organ class Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Constipation	1 (2.0)	1 (2.0)	0	0	0
Irritable bowel syndrome	1 (2.0)	0	1 (2.0)	0	0
Nausea	1 (2.0)	1 (2.0)	0	0	0
Vomiting	1 (2.0)	1 (2.0)	0	0	0
General disorders and administration site conditions					
-Total	9 (18.4)	4 (8.2)	3 (6.1)	1 (2.0)	1 (2.0)
Pyrexia	5 (10.2)	2 (4.1)	2 (4.1)	1 (2.0)	0
Pain	2 (4.1)	1 (2.0)	1 (2.0)	0	0
Fatigue	1 (2.0)	0	1 (2.0)	0	0

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 204h
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Hypodiploidy
Safety Set

Timing: Any time post CTL019 infusion, Hypodiploidy: Yes
