-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs started after the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 232c
Adverse events of special interest (AESI) at anytime during the study by group term, preferred term, maximum CTC grade and Race

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum

toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 232n
Adverse events of special interest (AESI) at anytime during the study by group term, preferred term, maximum CTC grade and Baseline bone marrow tumor burden

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Tumour lysis syndrome	3 (7.1)	0	0	1 (2.4)	2 (4.8)

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 233a
Deaths post CTL019 infusion by primary system organ class, preferred term and Age
Safety Set

Timing: Death within 30 days of CTL019 infusion, Age: <10 years

Primary system organ class Preferred term	All patients N=33 n (%)
Number of patients with at least one AE	1 (3.0)
Nervous system disorders	
-Total	1 (3.0)
Cerebral haemorrhage	1 (3.0)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233a
Deaths post CTL019 infusion by primary system organ class, preferred term and Age
Safety Set

Timing: Death within 30 days of CTL019 infusion, Age: >=10 years to <18 years

Primary system organ class Preferred term	All patients N=33 n (%)
Number of patients with at least one AE	1 (3.0)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (3.0)
Acute lymphocytic leukaemia	1 (3.0)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233a
Deaths post CTL019 infusion by primary system organ class, preferred term and Age
Safety Set

Timing: Death >30 days after CTL019 infusion, Age: <10 years

Primary system organ class Preferred term	All patients N=33 n (%)
Number of patients with at least one AE	15 (45.5)
General disorders and administration site conditions	
-Total	1 (3.0)
Multiple organ dysfunction syndrome	1 (3.0)
Infections and infestations	
-Total	2 (6.1)
Encephalitis	1 (3.0)

Table 233e
Deaths post CTL019 infusion by primary system organ class, preferred term and Response status at study entry
Safety Set

Timing: Death within 30 days of CTL019 infusion, Response status at study entry: Relapsed disease

Primary system organ class Preferred term	All patients N=74 n (%)
Number of patients with at least one AE	2 (2.7)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (1.4)
Acute lymphocytic leukaemia	1 (1.4)
Nervous system disorders	
-Total	1 (1.4)
Cerebral haemorrhage	1 (1.4)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233e
Deaths post CTL019 infusion by primary system organ class, preferred term and Response status at study entry
Safety Set

Timing: Death >30 days after CTL019 infusion, Response status at study entry: Primary refractory

Primary system organ class Preferred term	All patients N=6 n (%)
Number of patients with at least one AE	2 (33.3)
Immune system disorders	
-Total	1 (16.7)
Graft versus host disease	1 (16.7)
Infections and infestations	
-Total	1 (16.7)
Encephalitis	1 (16.7)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233e
Deaths post CTL019 infusion by primary system organ class, preferred term and Response status at study entry
Safety Set

Timing: Death >30 days after CTL019 infusion, Response status at study entry: Relapsed disease

Primary system organ class Preferred term	All patients N=74 n (%)
Number of patients with at least one AE	29 (39.2)
General disorders and administration site conditions	
-Total	2 (2.7)
Death	1 (1.4)
Multiple organ dysfunction syndrome	1 (1.4)
Hepatobiliary disorders	
-Total	1 (1.4)
Hepatobiliary disease	1 (1.4)
Infections and infestations	
-Total	2 (2.7)
Pneumonia bacterial	1 (1.4)

Timing: Death >30 days after CTL019 infusion, Response status at study entry: Relapsed disease

Primary system organ class Preferred term	All patients N=74 n (%)
Systemic mycosis	1 (1.4)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	24 (32.4)
Acute lymphocytic leukaemia	24 (32.4)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233e
Deaths post CTL019 infusion by primary system organ class, preferred term and Response status at study entry
Safety Set

Timing: Any time post CTL019 infusion, Response status at study entry: Primary refractory

Primary system organ class Preferred term	All patients N=6 n (%)
Number of patients with at least one AE	2 (33.3)
Immune system disorders	
-Total	1 (16.7)
Graft versus host disease	1 (16.7)
Infections and infestations	
-Total	1 (16.7)
Encephalitis	1 (16.7)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233e
Deaths post CTL019 infusion by primary system organ class, preferred term and Response status at study entry
Safety Set

Timing: Any time post CTL019 infusion, Response status at study entry: Relapsed disease

Primary system organ class Preferred term	All patients N=74 n (%)
Number of patients with at least one AE	31 (41.9)
General disorders and administration site conditions	
-Total	2 (2.7)
Death	1 (1.4)
Multiple organ dysfunction syndrome	1 (1.4)
Hepatobiliary disorders	
-Total	1 (1.4)
Hepatobiliary disease	1 (1.4)
Infections and infestations	
-Total	2 (2.7)
Pneumonia bacterial	1 (1.4)

Timing: Any time post CTL019 infusion, Response status at study entry: Relapsed disease

Primary system organ class Preferred term	All patients N=74 n (%)
Systemic mycosis	1 (1.4)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	25 (33.8)
Acute lymphocytic leukaemia	25 (33.8)
Nervous system disorders	
-Total	1 (1.4)
Cerebral haemorrhage	1 (1.4)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233f
Deaths post CTL019 infusion by primary system organ class, preferred term and Philadelphia chromosome/BCR-ABL
Safety Set

Timing: Death within 30 days of CTL019 infusion, Philadelphia chromosome/BCR-ABL: Non-Positive

Primary system organ class Preferred term	All patients N=78 n (%)
Number of patients with at least one AE	2 (2.6)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (1.3)
Acute lymphocytic leukaemia	1 (1.3)
Nervous system disorders	
-Total	1 (1.3)
Cerebral haemorrhage	1 (1.3)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233f
Deaths post CTL019 infusion by primary system organ class, preferred term and Philadelphia chromosome/BCR-ABL
Safety Set

Timing: Death >30 days after CTL019 infusion, Philadelphia chromosome/BCR-ABL: Non-Positive

Primary system organ class Preferred term	All patients N=78 n (%)
Number of patients with at least one AE	31 (39.7)
General disorders and administration site conditions	
-Total	2 (2.6)
Death	1 (1.3)
Multiple organ dysfunction syndrome	1 (1.3)
Hepatobiliary disorders	
-Total	1 (1.3)
Hepatobiliary disease	1 (1.3)
Immune system disorders	
-Total	1 (1.3)

Timing: Death >30 days after CTL019 infusion, Philadelphia chromosome/BCR-ABL: Non-Positive

Primary system organ class Preferred term	All patients N=78 n (%)
Graft versus host disease	1 (1.3)
Infections and infestations	
-Total	3 (3.8)
Encephalitis	1 (1.3)
Pneumonia bacterial	1 (1.3)
Systemic mycosis	1 (1.3)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	24 (30.8)
Acute lymphocytic leukaemia	24 (30.8)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233f
Deaths post CTL019 infusion by primary system organ class, preferred term and Philadelphia chromosome/BCR-ABL
Safety Set

Timing: Any time post CTL019 infusion, Philadelphia chromosome/BCR-ABL: Non-Positive

Primary system organ class Preferred term	All patients N=78 n (%)
Number of patients with at least one AE	33 (42.3)
General disorders and administration site conditions	
-Total	2 (2.6)
Death	1 (1.3)
Multiple organ dysfunction syndrome	1 (1.3)
Hepatobiliary disorders	
-Total	1 (1.3)
Hepatobiliary disease	1 (1.3)
Immune system disorders	
-Total	1 (1.3)

Timing: Any time post CTL019 infusion, Philadelphia chromosome/BCR-ABL: Non-Positive

Primary system organ class Preferred term	All patients N=78 n (%)
Graft versus host disease	1 (1.3)
Infections and infestations	
-Total	3 (3.8)
Encephalitis	1 (1.3)
Pneumonia bacterial	1 (1.3)
Systemic mycosis	1 (1.3)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	25 (32.1)
Acute lymphocytic leukaemia	25 (32.1)
Nervous system disorders	
-Total	1 (1.3)
Cerebral haemorrhage	1 (1.3)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233g
Deaths post CTL019 infusion by primary system organ class, preferred term and MLL rearrangement
Safety Set

Timing: Death within 30 days of CTL019 infusion, Mixed-lineage leukemia rearrangement: No

Primary system organ class Preferred term	All patients N=79 n (%)
Number of patients with at least one AE	2 (2.5)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (1.3)
Acute lymphocytic leukaemia	1 (1.3)
Nervous system disorders	
-Total	1 (1.3)
Cerebral haemorrhage	1 (1.3)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233g
Deaths post CTL019 infusion by primary system organ class, preferred term and MLL rearrangement
Safety Set

Timing: Death >30 days after CTL019 infusion, Mixed-lineage leukemia rearrangement: Yes

Primary system organ class Preferred term	All patients N=1 n (%)
Number of patients with at least one AE	1 (100)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (100)
Acute lymphocytic leukaemia	1 (100)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233g
Deaths post CTL019 infusion by primary system organ class, preferred term and MLL rearrangement
Safety Set

Timing: Death >30 days after CTL019 infusion, Mixed-lineage leukemia rearrangement: No

Primary system organ class Preferred term	All patients N=79 n (%)
Number of patients with at least one AE	30 (38.0)
General disorders and administration site conditions	
-Total	2 (2.5)
Death	1 (1.3)
Multiple organ dysfunction syndrome	1 (1.3)
Hepatobiliary disorders	
-Total	1 (1.3)
Hepatobiliary disease	1 (1.3)
Immune system disorders	
-Total	1 (1.3)

Primary system organ class Preferred term	All patients N=28 n (%)
Number of patients with at least one AE	9 (32.1)
General disorders and administration site conditions	
-Total	1 (3.6)
Multiple organ dysfunction syndrome	1 (3.6)
Hepatobiliary disorders	
-Total	1 (3.6)
Hepatobiliary disease	1 (3.6)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	7 (25.0)
Acute lymphocytic leukaemia	7 (25.0)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233k
Deaths post CTL019 infusion by primary system organ class, preferred term and Region
Safety Set

Timing: Any time post CTL019 infusion, Region: US

Primary system organ class Preferred term	All patients N=45 n (%)
Number of patients with at least one AE	20 (44.4)
General disorders and administration site conditions	
-Total	1 (2.2)
Death	1 (2.2)
Immune system disorders	
-Total	1 (2.2)
Graft versus host disease	1 (2.2)
Infections and infestations	
-Total	3 (6.7)
Encephalitis	1 (2.2)
Pneumonia bacterial	1 (2.2)
Systemic mycosis	1 (2.2)

Timing: Any time post CTL019 infusion, Region: US

Primary system organ class Preferred term	All patients N=45 n (%)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	14 (31.1)
Acute lymphocytic leukaemia	14 (31.1)
Nervous system disorders	
-Total	1 (2.2)
Cerebral haemorrhage	1 (2.2)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233k
Deaths post CTL019 infusion by primary system organ class, preferred term and Region
Safety Set

Timing: Any time post CTL019 infusion, Region: Rest of World

Primary system organ class Preferred term	All patients N=7 n (%)
Number of patients with at least one AE	4 (57.1)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	4 (57.1)
Acute lymphocytic leukaemia	4 (57.1)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233l
Deaths post CTL019 infusion by primary system organ class, preferred term and Prior SCT therapy
Safety Set

Timing: Death within 30 days of CTL019 infusion, Prior SCT therapy: No

Primary system organ class Preferred term	All patients N=32 n (%)
Number of patients with at least one AE	2 (6.3)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (3.1)
Acute lymphocytic leukaemia	1 (3.1)
Nervous system disorders	
-Total	1 (3.1)
Cerebral haemorrhage	1 (3.1)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233l
Deaths post CTL019 infusion by primary system organ class, preferred term and Prior SCT therapy
Safety Set

Timing: Death >30 days after CTL019 infusion, Prior SCT therapy: Yes

Primary system organ class Preferred term	All patients N=48 n (%)
Number of patients with at least one AE	20 (41.7)
Infections and infestations	
-Total	2 (4.2)
Pneumonia bacterial	1 (2.1)
Systemic mycosis	1 (2.1)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	18 (37.5)
Acute lymphocytic leukaemia	18 (37.5)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233l
Deaths post CTL019 infusion by primary system organ class, preferred term and Prior SCT therapy
Safety Set

Timing: Death >30 days after CTL019 infusion, Prior SCT therapy: No

Primary system organ class Preferred term	All patients N=32 n (%)
Number of patients with at least one AE	11 (34.4)
General disorders and administration site conditions

-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233q
Deaths post CTL019 infusion by primary system organ class, preferred term and Time since enrollment to CTL019 infusion
Safety Set

Timing: Death >30 days after CTL019 infusion, Time since enrollment to CTL019 infusion: > Median

Primary system organ class Preferred term	All patients N=40 n (%)
Number of patients with at least one AE	15 (37.5)
General disorders and administration site conditions	
-Total	1 (2.5)
Multiple organ dysfunction syndrome	1 (2.5)
Hepatobiliary disorders	
-Total	1 (2.5)
Hepatobiliary disease	1 (2.5)
Immune system disorders	
-Total	1 (2.5)
Graft versus host disease	1 (2.5)

Timing: Death >30 days after CTL019 infusion, Time since enrollment to CTL019 infusion: > Median

Primary system organ class Preferred term	All patients N=40 n (%)
Infections and infestations	
-Total	1 (2.5)
Systemic mycosis	1 (2.5)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	11 (27.5)
Acute lymphocytic leukaemia	11 (27.5)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233q
Deaths post CTL019 infusion by primary system organ class, preferred term and Time since enrollment to CTL019 infusion
Safety Set

Timing: Death >30 days after CTL019 infusion, Time since enrollment to CTL019 infusion: <=Median

Primary system organ class Preferred term	All patients N=40 n (%)
Number of patients with at least one AE	16 (40.0)
General disorders and administration site conditions	
-Total	1 (2.5)
Death	1 (2.5)
Infections and infestations	
-Total	2 (5.0)
Encephalitis	1 (2.5)
Pneumonia bacterial	1 (2.5)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	

Timing: Death >30 days after CTL019 infusion, Time since enrollment to CTL019 infusion: <=Median

Primary system organ class Preferred term	All patients N=40 n (%)
-Total	13 (32.5)
Acute lymphocytic leukaemia	13 (32.5)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233q
Deaths post CTL019 infusion by primary system organ class, preferred term and Time since enrollment to CTL019 infusion
Safety Set

Timing: Any time post CTL019 infusion, Time since enrollment to CTL019 infusion: > Median

Primary system organ class Preferred term	All patients N=40 n (%)
Number of patients with at least one AE	15 (37.5)
General disorders and administration site conditions	
-Total	1 (2.5)
Multiple organ dysfunction syndrome	1 (2.5)
Hepatobiliary disorders	
-Total	1 (2.5)
Hepatobiliary disease	1 (2.5)
Immune system disorders	
-Total	1 (2.5)
Graft versus host disease	1 (2.5)

Timing: Any time post CTL019 infusion, Time since enrollment to CTL019 infusion: > Median

Primary system organ class Preferred term	All patients N=40 n (%)
Infections and infestations	
-Total	1 (2.5)
Systemic mycosis	1 (2.5)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	11 (27.5)
Acute lymphocytic leukaemia	11 (27.5)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233q
Deaths post CTL019 infusion by primary system organ class, preferred term and Time since enrollment to CTL019 infusion
Safety Set

Timing: Any time post CTL019 infusion, Time since enrollment to CTL019 infusion: <=Median

Primary system organ class Preferred term	All patients N=40 n (%)
Number of patients with at least one AE	18 (45.0)
General disorders and administration site conditions	
-Total	1 (2.5)
Death	1 (2.5)
Infections and infestations	
-Total	2 (5.0)
Encephalitis	1 (2.5)
Pneumonia bacterial	1 (2.5)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	

Timing: Any time post CTL019 infusion, Time since enrollment to CTL019 infusion: <=Median

Primary system organ class Preferred term	All patients N=40 n (%)
-Total	14 (35.0)
Acute lymphocytic leukaemia	14 (35.0)
Nervous system disorders	
-Total	1 (2.5)
Cerebral haemorrhage	1 (2.5)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233r
Deaths post CTL019 infusion by primary system organ class, preferred term and Number of previous relapses
Safety Set

Timing: Death within 30 days of CTL019 infusion, Number of previous relapses: 1

Primary system organ class Preferred term	All patients N=22 n (%)
Number of patients with at least one AE	1 (4.5)
Nervous system disorders	
-Total	1 (4.5)
Cerebral haemorrhage	1 (4.5)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233r
Deaths post CTL019 infusion by primary system organ class, preferred term and Number of previous relapses
Safety Set

Timing: Death within 30 days of CTL019 infusion, Number of previous relapses: 2

Primary system organ class Preferred term	All patients N=17 n (%)
Number of patients with at least one AE	1 (5.9)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	
-Total	1 (5.9)
Acute lymphocytic leukaemia	1 (5.9)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233r
Deaths post CTL019 infusion by primary system organ class, preferred term and Number of previous relapses
Safety Set

Timing: Death >30 days after CTL019 infusion, Number of previous relapses: 0

Primary system organ class Preferred term	All patients N=6 n (%)
Number of patients with at least one AE	2 (33.3)
Immune system disorders	
-Total	1 (16.7)
Graft versus host disease	1 (16.7)
Infections and infestations	
-Total	1 (16.7)
Encephalitis	1 (16.7)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233r
Deaths post CTL019 infusion by primary system organ class, preferred term and Number of previous relapses
Safety Set

Timing: Death >30 days after CTL019 infusion, Number of previous relapses: 1

Primary system organ class Preferred term	All patients N=22 n (%)
Number of patients with at least one AE	9 (40.9)
General disorders and administration site conditions	
-Total	2 (9.1)
Death	1 (4.5)
Multiple organ dysfunction syndrome	1 (4.5)
Infections and infestations	
-Total	1 (4.5)
Pneumonia bacterial	1 (4.5)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)	

Timing: Death >30 days after CTL019 infusion, Number of previous relapses: 1

Primary system organ class Preferred term	All patients N=22 n (%)
-Total	6 (27.3)
Acute lymphocytic leukaemia	6 (27.3)

-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency as reported in the All patients column.
-MedDRA version 25.1 has been used for the reporting of adverse events.

Table 233r
Deaths post CTL019 infusion by primary system organ class, preferred term and Number of previous relapses
Safety Set

Timing: Death >30 days after CTL019 infusion, Number of previous relapses: 2

Primary system organ class Preferred term	All patients N=17 n (%)
Number of patients with at least one AE	5 (29.4)
Hepatobiliary disorders	
-Total	1 (5.9)
Hepatobiliary disease	1 (5.9)
Neoplasms benign, malignant and unspecified (incl cysts and polyps)

-A patient with multiple adverse events within a group term is counted only once in the

total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis

product is received and accepted by the manufacturing facility. -Only AEs started after the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized. -A patient with multiple adverse events within a group term is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade. -Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 247r
Serious adverse events of special interest (AESI) during the lymphodepleting period, regardless of relationship to lymphodepleting chemotherapy, by group term, preferred term, maximum CTC grade and Number of previous relapses
Enrolled set - Patients who received lymphodepleting chemotherapy

Number of previous relapses: 2

	All patients N=15				
Group term Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	0	0	0	0	0

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -A patient with multiple adverse events within a group term is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum

toxicity grade. -Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -A patient with multiple adverse events within a group term is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum

toxicity grade. -Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -A patient with multiple adverse events within a group term is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum

toxicity grade. -Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -A patient with multiple adverse events within a group term is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum

toxicity grade. -Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility. -A patient with multiple adverse events within a group term is counted only once in the total row. -A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum

toxicity grade. -Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column. -MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Hypertension	2	1 (16.67)	1	1 (16.67)

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events. Percentages are calculated out of number of patients at each timepoint in safety set 1 number of patients with any AE (irrespective of grade) 2 number of patients with Grade 3 or more AE

Table 250e
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Response status at study entry
Safety Set

Timing: within 8 weeks post infusion, Response status at study entry: Relapsed disease

Primary system organ class Preferred term	All grades Total events	All patients N=74 n (%)[1]	Grade >= 3 Total events	All patients N=74 n (%)[2]
Total number of AE per patient	1540	73 (98.65)	537	63 (85.14)
Blood and lymphatic system disorders				
- Total	112	46 (62.16)	70	35 (47.30)
Anaemia	43	19 (25.68)	20	8 (10.81)
Febrile neutropenia	26	23 (31.08)	26	23 (31.08)
Neutropenia	11	9 (12.16)	9	7 (9.46)
Thrombocytopenia	7	7 (9.46)	7	7 (9.46)
Disseminated intravascular coagulation	6	6 (8.11)	1	1 (1.35)
Coagulopathy	4	4 (5.41)	1	1 (1.35)
Leukopenia	4	3 (4.05)	3	2 (2.70)
Splenomegaly	4	4 (5.41)	0	0 (0.00)
Eosinophilia	2	1 (1.35)	0	0 (0.00)
Pancytopenia	2	2 (2.70)	2	2 (2.70)

Timing: within 8 weeks post infusion, Response status at study entry: Relapsed disease

Primary system organ class Preferred term	All grades Total events	All patients N=74 n (%)[1]	Grade >= 3 Total events	All patients N=74 n (%)[2]
B-cell aplasia	1	1 (1.35)	0	0 (0.00)
