Modul 4 A - Separater Anhang 4-H.1 (Teil 2)

Refraktäre oder rezidivierte pädiatrische akute lymphatische B-Zell-Leukämie

Studie CCTL019B2202 (ELIANA)

Stand: 31.08.2023

Table of Contents

Table 221a

Severe adverse events (AE CTCAE Grade 3/4) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Age

Enrolled set - Patients who received lymphodepleting chemotherapy

Age: <10 years

	All patients N=34		
Group term Preferred term	**All grades n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	11 (32.4)	0	11 (32.4)
Blood and lymphatic system disorders			
-Total	3 (8.8)	3 (8.8)	0
Anaemia	3 (8.8)	3 (8.8)	0
Investigations			
-Total	11 (32.4)	0	11 (32.4)
White blood cell count decreased	6 (17.6)	1 (2.9)	5 (14.7)
Lymphocyte count decreased	5 (14.7)	0	5 (14.7)
Platelet count decreased	5 (14.7)	1 (2.9)	4 (11.8)
Neutrophil count decreased	4 (11.8)	1 (2.9)	3 (8.8)

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 221a
Severe adverse events (AE CTCAE Grade 3/4) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Age
Enrolled set - Patients who received lymphodepleting chemotherapy

Age: >=10 years to <18 years

	All patients N=31		
Group term Preferred term	**All grades n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	8 (25.8)	3 (9.7)	5 (16.1)
Blood and lymphatic system disorders			
-Total	3 (9.7)	3 (9.7)	0
Anaemia	3 (9.7)	3 (9.7)	0
Febrile neutropenia	2 (6.5)	2 (6.5)	0
Investigations			
-Total	5 (16.1)	1 (3.2)	4 (12.9)
White blood cell count decreased	4 (12.9)	1 (3.2)	3 (9.7)
Neutrophil count decreased	2 (6.5)	0	2 (6.5)
Lymphocyte count decreased	1 (3.2)	0	1 (3.2)
Platelet count decreased	1 (3.2)	0	1 (3.2)

Age: >=10 years to <18 years

Group term Preferred term	All patients N=31 All grades n (%)	Grade 3 n (%)	Grade 4 n (%)
Metabolism and nutrition disorders			
-Total	3 (9.7)	2 (6.5)	1 (3.2)
Hypokalaemia	3 (9.7)	2 (6.5)	1 (3.2)

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 221a
Severe adverse events (AE CTCAE Grade 3/4) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Age
Enrolled set - Patients who received lymphodepleting chemotherapy

Age: >=18

	All patients N=13		
Group term Preferred term	**All grades n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	3 (23.1)	2 (15.4)	1 (7.7)
Blood and lymphatic system disorders			
-Total	2 (15.4)	2 (15.4)	0
Febrile neutropenia	2 (15.4)	2 (15.4)	0
Infections and infestations			
-Total	3 (23.1)	2 (15.4)	1 (7.7)
Bacteraemia	1 (7.7)	1 (7.7)	0
Escherichia bacteraemia	1 (7.7)	0	1 (7.7)
Oral herpes	1 (7.7)	1 (7.7)	0
Staphylococcal bacteraemia	1 (7.7)	1 (7.7)	0
Metabolism and nutrition disorders			

Age: >=18

Group term Preferred term	All patients N=13 All grades n (%)	Grade 3 n (%)	Grade 4 n (%)
-Total	1 (7.7)	1 (7.7)	0
Hypocalcaemia	1 (7.7)	1 (7.7)	0
Musculoskeletal and connective tissue disorders			
-Total	1 (7.7)	1 (7.7)	0
Pain in jaw	1 (7.7)	1 (7.7)	0

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 221f
Severe adverse events (AE CTCAE Grade 3/4) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL
Enrolled set - Patients who received lymphodepleting chemotherapy

Philadelphia chromosome/BCR-ABL: Non-Positive

	All patients N=77		
Group term Preferred term	**All grades n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	19 (24.7)	4 (5.2)	15 (19.5)
Blood and lymphatic system disorders			
-Total	8 (10.4)	8 (10.4)	0
Anaemia	6 (7.8)	6 (7.8)	0
Febrile neutropenia	4 (5.2)	4 (5.2)	0
Investigations			
-Total	16 (20.8)	1 (1.3)	15 (19.5)
White blood cell count decreased	10 (13.0)	2 (2.6)	8 (10.4)
Lymphocyte count decreased	6 (7.8)	0	6 (7.8)
Neutrophil count decreased	6 (7.8)	1 (1.3)	5 (6.5)
Platelet count decreased	6 (7.8)	1 (1.3)	5 (6.5)

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 221g
Severe adverse events (AE CTCAE Grade 3/4) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement
Enrolled set - Patients who received lymphodepleting chemotherapy

Mixed-lineage leukemia rearrangement: No

	All patients N=77		
Group term Preferred term	**All grades n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	19 (24.7)	4 (5.2)	15 (19.5)
Blood and lymphatic system disorders			
-Total	8 (10.4)	8 (10.4)	0
Anaemia	6 (7.8)	6 (7.8)	0

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 222g

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 222j

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 222o
Severe adverse events (AE CTCAE Grade 3/4) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.

-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 223a

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 223b
Severe adverse events (AE CTCAE Grade 3/4) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Gender

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 223d
Severe adverse events (AE CTCAE Grade 3/4) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Ethnicity

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 223e
Severe adverse events (AE CTCAE Grade 3/4) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Response status at study entry

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 223n
Severe adverse events (AE CTCAE Grade 3/4) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden
Enrolled set

Baseline bone marrow tumor burden: High

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 223p
Severe adverse events (AE CTCAE Grade 3/4) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Down syndrome

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 223q

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 226a

Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Age

Age: >=10 years to <18 years

	All patients N=31		
Group term Preferred term	All grades n (%)	Grade 3 n (%)	Grade 4 n (%)
No records met the criteria			

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 226a

Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Age

Age: >=18

	All patients N=13		
Group term Preferred term	All grades n (%)	Grade 3 n (%)	Grade 4 n (%)
No records met the criteria			

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 226b

Serious adverse events (SAE) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Gender

Gender: Male

	All patients N=46		
Group term Preferred term	All grades n (%)	Grade 3 n (%)	Grade 4 n (%)
No records met the criteria			

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 227g

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 227j

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Upper respiratory tract infection	1 (14.3)	0	1 (14.3)	0	0

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported

in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.

-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Tumour Lysis Syndrome					

Timing: Any time post CTL019 infusion, Response status at study entry: Relapsed disease

	All patients N=74				
Group term Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
-Total	5 (6.8)	0	0	4 (5.4)	1 (1.4)
Tumour lysis syndrome	5 (6.8)	0	0	4 (5.4)	1 (1.4)

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 229f
Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL
Safety Set

Timing: within 8 weeks post infusion, Philadelphia chromosome/BCR-ABL: Positive

Tumour Lysis Syndrome					

Timing: Any time post CTL019 infusion, Philadelphia chromosome/BCR-ABL: Non-Positive

			All patients N=78		
Group term Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
-Total	4 (5.1)	0	0	3 (3.8)	1 (1.3)
Tumour lysis syndrome	4 (5.1)	0	0	3 (3.8)	1 (1.3)

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 229g
Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and MLL rearrangement
Safety Set

Timing: within 8 weeks post infusion, Mixed-lineage leukemia rearrangement: Yes

Number of patients with at least one AE	1 (100)	0	1 (100)	0	0
Infections					
-Total	1 (100)	0	1 (100)	0	0
Staphylococcal infection	1 (100)	0	1 (100)	0	0

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Tumour Lysis Syndrome					
-Total	2 (7.4)	0	0	2 (7.4)	0

Timing: within 8 weeks post infusion, Complex karyotypes II (>=5 unrelated abnormalities) : Yes

		All patients N=27			
Group term Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Tumour lysis syndrome	2 (7.4)	0	0	2 (7.4)	0

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.

-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.

-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Memory impairment	1 (4.0)	0	1 (4.0)	0	0
Seizure	1 (4.0)	0	0	1 (4.0)	0

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 229n
Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Baseline bone marrow tumor burden
Safety Set

Timing: >8 weeks to 1 year post CTL019 infusion, Baseline bone marrow tumor burden: High

		All patients N=50

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Tumour Lysis Syndrome					
-Total	5 (7.2)	0	0	4 (5.8)	1 (1.4)

Timing: Any time post CTL019 infusion, Baseline extramedullary disease presence: No

	All patients N=69				
Group term Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Tumour lysis syndrome	5 (7.2)	0	0	4 (5.8)	1 (1.4)

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.

-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Tumour lysis syndrome	2 (5.0)	0	0	2 (5.0)	0

-A patient with multiple adverse events within a group term is counted only once in the total row.

-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 229q
Adverse events of special interest (AESI) post CTL019 infusion based on identified risks, regardless of study drug relationship, by group term, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion

-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are

summarized.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received

and accepted by the manufacturing facility
-Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs started after the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
-Only AEs started after the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.
