-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events. Percentages are calculated out of number of patients at each timepoint in safety set 1 number of patients with any AE (irrespective of grade) 2 number of patients with Grade 3 or more AE

Table 250j
Number of adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term and Complex Karyotypes
Safety Set

Timing: within 8 weeks post infusion, Complex karyotypes II (>=5 unrelated abnormalities) : Yes

Primary system organ class Preferred term	All grades Total events	All patients N=27 n (%)[1]	Grade >= 3 Total events	All patients N=27 n (%)[2]
Total number of AE per patient	575	26 (96.30)	194	20 (74.07)
Blood and lymphatic system disorders				
- Total	18	12 (44.44)	8	7 (25.93)
Anaemia	4	4 (14.81)	0	0 (0.00)
Disseminated intravascular coagulation	4	4 (14.81)	1	1 (3.70)
Febrile neutropenia	3	3 (11.11)	3	3 (11.11)
Neutropenia	3	3 (11.11)	2	2 (7.41)
Thrombocytopenia	2	2 (7.41)	2	2 (7.41)
Coagulopathy	1	1 (3.70)	0	0 (0.00)
Splenomegaly	1	1 (3.70)	0	0 (0.00)
Cardiac disorders				
- Total	11	7 (25.93)	2	2 (7.41)

Timing: within 8 weeks post infusion, Complex karyotypes II (>=5 unrelated abnormalities) : Yes

Primary system organ class Preferred term	All grades Total events	All patients N=27 n (%)[1]	Grade >= 3 Total events	All patients N=27 n (%)[2]
Tachycardia	5	3 (11.11)	2	2 (7.41)

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the

All patients column.
- MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the

All patients column.
- MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the

All patients column.
- MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the

All patients column.
- MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the

All patients column.
- MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the

All patients column.
- MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the

All patients column.
- MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257b
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Gender

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257f
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Philadelphia chromosome/BCR-ABL
Safety Set

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257g
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and MLL rearrangement
Safety Set

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257j
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Complex Karyotypes

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257k
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Region

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257k
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Region

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257m
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Eligibility for SCT
Safety Set

Timing: within 8 weeks post infusion, Eligibility for SCT: No

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257m
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Eligibility for SCT
Safety Set

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257n
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Baseline bone marrow tumor burden

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257n
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Baseline bone marrow tumor burden
Safety Set

-A patient with multiple adverse events within a group term is counted only once in the total row.

-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257p
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Down syndrome
Safety Set

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257p
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Down syndrome

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257q
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Time since enrollment to CTL019 infusion

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257q
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Time since enrollment to CTL019 infusion
Safety Set

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 257r
Non-severe adverse events (AE CTCAE Grade 1/2) post CTL019 infusion that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) ,regardless of study drug relationship, by primary system organ class, preferred term and maximum CTC grade and Number of previous relapses
Safety Set

-A patient with multiple adverse events within a group term is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.

-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion, are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 261q
Non-severe adverse events (AE CTCAE Grade 1/2) during lymphodepleting period that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term and maximum CTC grade and Time since enrollment to CTL019 infusion
Enrolled set - Patients who received lymphodepleting chemotherapy

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and

accepted by the manufacturing facility
-Only AEs occured to non-infused patients are summarized.
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 263r
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term and maximum CTC grade and Number of previous relapses
Enrolled set – non – infused patients

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 265e
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term and maximum CTC grade and Response status at study entry

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 265f
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term and maximum CTC grade and Philadelphia chromosome/BCR-ABL

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 265j

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 265o
Non-severe adverse events (AE CTCAE Grade 1/2) that occurred in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term and maximum CTC grade and Baseline extramedullary disease presence

-Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
-A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
-A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
-System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
-MedDRA version 25.1 and CTCAE version 4.03 have been used for the reporting of adverse events.

[1] Percentiles with 95% CIs are calculated from PROC LIFETEST output using method of Brookmeyer and Crowley (1982)
[2] % Event-free probability estimate is the estimated probability that a patient will remain event-free up to the specified time point. % Event-free probability estimates are obtained from the Kaplan-Meier survival estimates; Greenwood formula is used for CIs of KM estimates.
